ONLINE CONFERENCE PROGRAM

In the online conference program, there is access to the program timetable and individual sessions. Main sessions are both *streamed and recorded* for later access. Abstracts can be read in full, and there is extra material like download of presentations, papers and view of per-recorded videos. The poster gallery offers a unique online space for young researchers to present. All abstracts include a chat function for dialogue with authors and delegates. One of the strong features is the *social networking feature*. Here delegates easily create an online badge with chat and video call to other delegates. As an exhibitor you, and your representatives can create badges and interact online with delegates.
